Claims 1,3,5,7-11 and 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Boger et al, cited by applicants. The instant claims although reciting properties of (e.g. anti-cancer) certain epoxyamides are technically drawn to the compounds. Epoxyoleamide disclosed by the reference is an example of the many known epoxyamide compounds encompassed by the claims.

Claims 1, 3, 5, 7-11 and 13 -15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Only amides of formula (1) where the substituents attached to the oxirane ring are in the cis-configuration are enabled.

The claims as presently drawn encompass a broad scope epoxyamides the utility of which has not been enabled. For example it would take undue experimentation for the person of ordinary skill in the art to determine whether an epoxyamide within the scope of the claims is a cancer metathesis inhibitor.

Applicants should rewrite the claims as anti-cancer composition claims and limit the scope of the active ingredient as in claim 7 with the above limitation stating that the substituents attached to the epoxy ring are in the cis -configuration.
